

Sprint Layout:

- Rachel:
 - Last week: Created Forgot Password page
 - This week: Link login page to Lulu's search classes page
 - Road Blocks: need to know the level that the front end needs to get down to -- for example do we need to make dynamic HTML pages or will that be a middle layer job?
- Drake:
 - Last week: Designed databases for backend
 - This week: Create databases in POSTGRES, lookup encryption for passwords and whatnot
 - Road blocks: learning encryption
- Kin
 - Last week: Designed databases for backend
 - This week: Create tables, research encryption
 - Road Blocks: learning encryption
- Lulu
 - Last week: Initialized HTML page, create drop box for classify all the classes student could choose and search bar for CS class if they know their class number
 - This week: complete search page for Study Buddy App, added examples of how each search bar should be entered.
 - Road Blocks: To know how middle layer and back end doing in order to make the next step.

After the sprint concluded, the team began work on their respective tasks for the week.
