

Sprint Layout:

- Rachel
 - Last week: Link login page to Lulu's search classes page
 - This week: Keep team focused on producing Milestone 4.
 - Next week: Keep team focused on producing Milestone 4.
 - Roadblocks: Limited knowledge of SQL to help with
- Drake
 - Last week: Working on the database with Drake
 - This week: Working on Milestone 4 and creating database
 - Next week: Finish the database and Milestone 4
 - Roadblocks: Decide the data type
- Kin
 - Last week: Working on the database with Drake
 - This week: Working on Milestone 4 and creating database
 - Next week: Finish the database and Milestone 4
 - Roadblocks: Decide the data type
- Lulu
 - Last week: Completed search page for Study Buddy App, added examples of how each search bar should be entered.
 - This week: get an idea of how database is structured, get an idea of how search page table should look like in database.
 - Next week: Finish milestone 4 as a group
 - Roadblocks: Not familiar with SQL
- Christian
 - Last week: Researching js integration without using ExpressJS
 - This week: Test to see if we can convert the html to .ejs and structure the app around ExpressJS or not.
 - Next week: Write the integration for the profile table. Finish Milestone 4.
 - Roadblocks: Not entirely sure how to integrate without using ExpressJS. Need to check how similar the syntax will be.

After the sprint concluded, the team began work on their respective tasks for the week.
