Sprint Layout:
- Rachel:
  - Last week: Created home page layout
  - This week: Create forgot password and user input page
  - Road Blocks: HTML learning curve (not really a road block, but takes a bit more work to get things done).
- Drake:
  - Absent due to prior commitment
- Kin
  - Last week: Initialized the database
  - This week: Create tables for database with Drake.
  - Road Blocks: Learning how to work with database
- Lulu
  - Last week: Initialize html page
  - This week: create drop box for classify all the classes student could choose and search bar for CS class if they know their class number
  - Road Blocks: Learning HTML while doing it and organize the web.
- Christian:
  - Last Week: Pushed JavaScript for establishing connection to postgresql RDB to GitHub.
  - This Week: Test script with actual database, create script for user info database. Start user account scripting.
  - Road Blocks: Learning node.JS, postgres specific syntax for integration.

After the sprint concluded, the team began work on their respective tasks for the week.
